

Workwear Flex

Shared workwear with more visibility and control

Workwear Flex is an add-on to our Workwear Service for companies using shared garments. It helps keep clean workwear available, gives you better visibility into usage and makes changing workwear needs easier to manage.

Garment availability

Better visibility into garment circulation helps you keep the right amount of clean workwear available.

Reduced admin

Digital tracking reduces routine checks and makes workwear management easier.

Flexible service

Shared garments make it easier to respond when employee numbers and workwear needs change.

Good for managers. Easy for employees.

For managers

- See usage
- Optimise stock
- Reduce admin work
- eLindström digital platform

For employees

- Clean garments every shift
- Quick self-service
- Easy onboarding
- Choose the right fit

Register. Use. Return.

It's that simple.

1.

Return dirty workwear

Garments are automatically scanned.

2.

Select clean workwear

Choose the garment and size you need.

3.

Register workwear into use

Register at the check-out station.

“We have gone from 30 people in the pilot phase to now more than 200 of our ground handling staff using the Workwear Flex service, and that goes on to show the flexibility of the service.”

Mārtiņš Mikstans

Deputy Director for Business Development,
Riga International Airport

Simplify workwear management
